Education

Maulana Abul Kalam Azad University of Technology — Kolkata, West Bengal
Bachelor of Technology in Computer Science & Engineering – CGPA: 7.67 — *Aug. 2024 – Jul. 2028*

Alipurduar New Town Girls' High School (H.S.) — Alipurduar, West Bengal
Higher Secondary Education – Grade: A — *Aug. 2021 – Jun. 2023*

Experience

Smart India Hackathon (SIH) — IIT Roorkee, Uttarakhand
Team Member — BSF IC3 Communication & Tracking System — *Oct. 2025 – Dec. 2025*

- Contributed to an Integrated Command, Control & Communication System (IC3) prototype using ESP32, GPS, LoRa, and GSM for location tracking and multi-mode communication in low-connectivity environments.
- Developed an interactive map-based dashboard using HTML, CSS, and JavaScript to visualize live GPS locations and support field coordination, tracking, and communication.

Projects

Kinetalon | ***Real-Time AI Gym Trainer***

- **Tech Stack:** Python, MediaPipe, OpenCV, Streamlit, WebRTC, SQLite, LLM API, gTTS
- Developed a real-time AI fitness coaching application using MediaPipe and OpenCV for pose detection, exercise repetition counting, workout tracking, and joint-angle-based form analysis.
- Integrated LLM-generated coaching feedback and text-to-speech for real-time voice guidance, alongside user authentication, customizable workout plans, and SQLite-based workout history tracking.

Peaflux | ***Neural Style Transfer Web Application***

- **Tech Stack:** Python, PyTorch, CNN, AdaIN, Flask
- Developed a Neural Style Transfer web application using Python, PyTorch, CNNs, and AdaIN to blend image content with artistic styles.
- Implemented an AdaIN-based stylization pipeline and Flask interface for image uploads and generation of visually stylized outputs while preserving content structure.

Corvanta | ***AI-Powered Face and Voice Attendance System***

- **Tech Stack:** Python, Deep Learning, Face Recognition, Voice Recognition, SVC, SQL
- Developed an AI-based attendance system using face recognition on classroom group photos and voice verification to automate student attendance marking.
- Built an interface with teacher/student authentication, subject enrollment, duplicate-resistant attendance tracking, and attendance reports.

Achievements

- **SAP Hackathon:** Selected in the internal round from 50+ participating teams.
- **Smart India Hackathon (SIH) 2025:** Secured 1st position in the internal round for a blockchain-based application.
- **Smart India Hackathon (SIH) 2025 Finalist:** Selected as a finalist for a hardware-based communication and tracking system.

Certifications

- **Oracle Certified Foundations Associate – Agentic AI** — September 2026

Technical Skills

Programming Languages: Python, C, Java, JavaScript
AI/ML & GenAI: Supervised/Unsupervised Learning, Deep Learning, CNNs, RNNs, Transformers, LLMs, NLP, RAG, OpenAI APIs
Data Science: NumPy, Pandas, Matplotlib, EDA, Data Preprocessing, Feature Engineering
Web Development: React.js, Node.js, Express.js, REST APIs
Databases: MongoDB, SQL
Tools: TensorFlow, Jupyter Notebook, Git, GitHub, Docker, Kubernetes
