Education

Siliguri Institute of Technology — Siliguri, West Bengal
Bachelor of Technology in Computer Science & Engineering – CGPA: 7.67 — *Aug. 2024 – Jul. 2028*

Experience

Smart India Hackathon (SIH) — IIT Roorkee, Uttarakhand
Team Member — BSF IC3 Communication & Tracking System — *Oct. 2025 – Dec. 2025*

- Developed a working prototype of a rugged handheld Integrated Command, Control & Communication System (IC3) for a problem statement of Ministry of Home Affairs.
- Designed an interactive map-based dashboard using HTML, CSS, and JavaScript to support live location tracking and multi-mode communication in low-connectivity environments.

Projects

MeetSphere | ***Real-Time Video Calling Platform*** — MeetSphere.com

- **Tech Stack:** React, Node.js, Express.js, WebRTC, Socket.IO, Material UI, Axios, Bcrypt, MongoDB
- Built a full-stack video conferencing platform tested with 10+ users across multiple meetings, using Node.js, Express.js, MongoDB, React, Material UI, and Axios for authentication, meeting management, and participant access.
- Implemented real-time video conferencing for multiple meetings using WebRTC and Socket.IO, enabling audio/video controls, screen sharing, text messaging, meeting-code based communication, and interactive participant management.

Dugong | ***Stock Trading Platform*** — GitHub – Dugong

- **Tech Stack:** HTML, CSS, JavaScript, React, Bootstrap, Material UI, Node.js, Express.js, MongoDB
- Built a full-stack stock trading platform with interactive buy/sell functionality, stock listings, and authentication using React, JavaScript, Bootstrap, and Material UI, enabling users to manage trades through a responsive dashboard.
- Developed RESTful APIs with Node.js and Express.js and integrated MongoDB to manage users, orders, and trading data, enabling real-time persistence and dynamic updates of transactions across the dashboard.

Pangolin | ***Version Control Platform*** — Aug. 2026 – Present

- **Tech Stack:** HTML, CSS, JavaScript, React, Bootstrap, Node.js, Express.js, Yargs, MongoDB
- Developing a terminal-based system that replicates core Git operations including repository initialization, file staging, committing, pushing, pulling, and reverting through user-entered commands.
- Developed a React frontend with a Node.js and Express.js backend, using MongoDB for data management and JWT for authentication.

Achievements

- **SAP Hackathon:** Selected in the internal round from 50+ participating teams.
- **Smart India Hackathon (SIH) 2025:** Secured 1st position in the internal round for a blockchain-based application.
- **Smart India Hackathon (SIH) 2025 Finalist:** Selected as a finalist for a hardware-based communication and tracking system.

Technical Skills

Operating System: Linux(Ubuntu), Windows
Languages: Java, JavaScript, HTML5, CSS3
Frontend: React.js, Bootstrap, Material UI
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Developer Tools: Git, GitHub, VS Code, Thunder Client
Core CS: OOP, Computer Networks, DBMS, Operating Systems
